Water

Trace the letter W

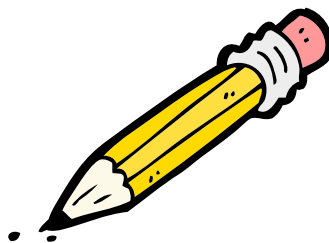

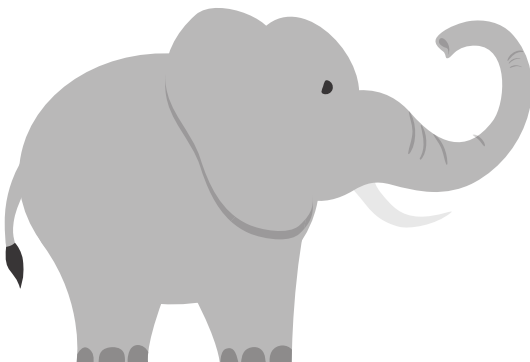

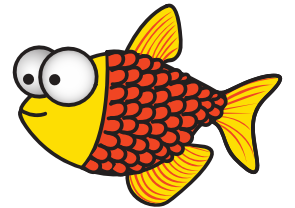

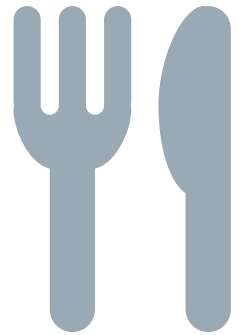

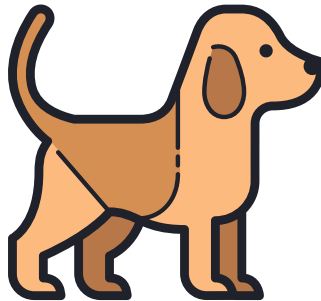

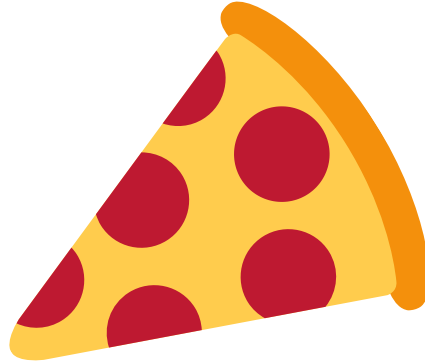

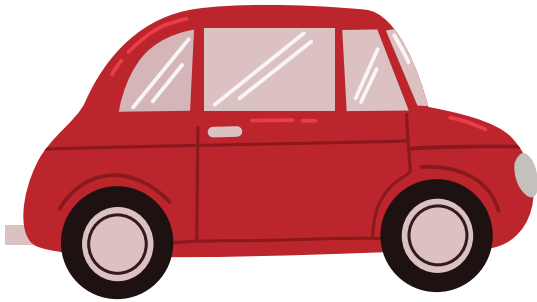

W is for Water

Water is essential for all living things to survive, including, plants, animals, and people.

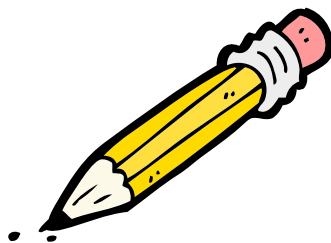

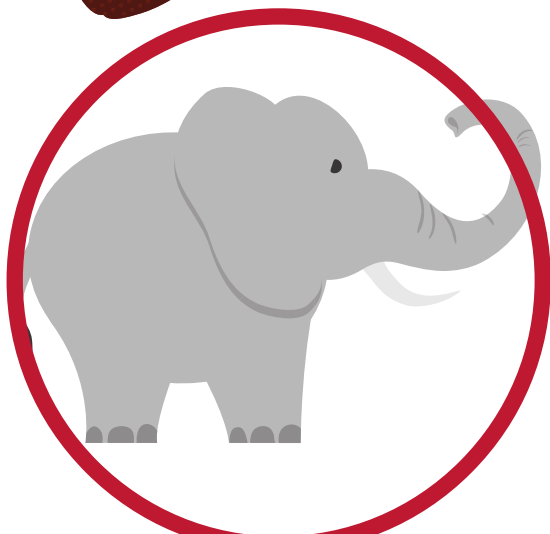

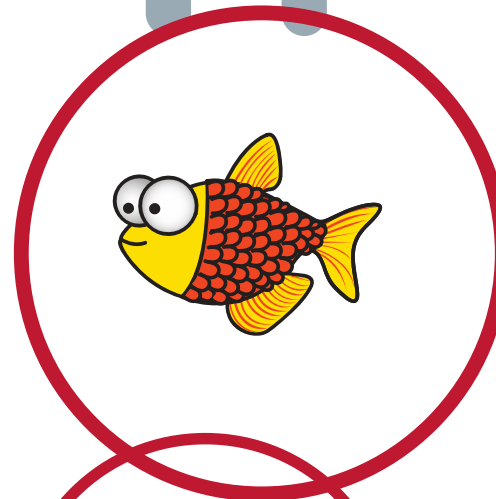

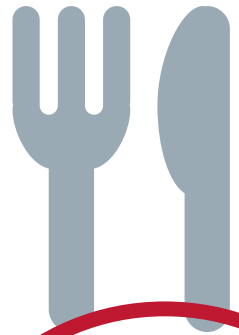

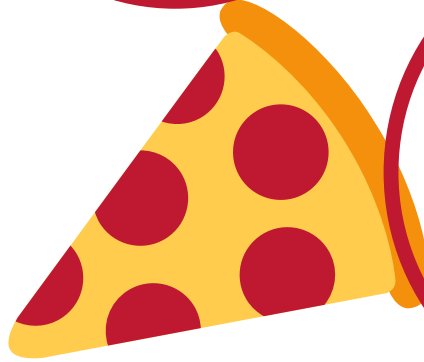

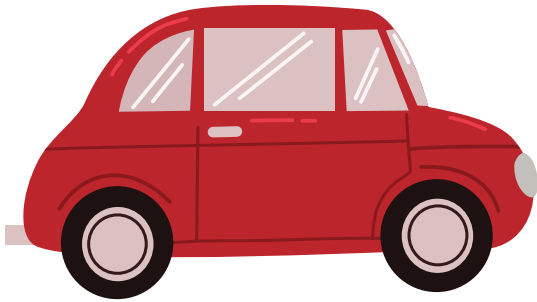

The human body is more than 3/4 water. Living things use water to carry nutrient and take away waste. It helps stay hydrated, keep organisms cool, break down food and many other things.

Circle the items that need water to survive

Circle the items that need water to survive

Water is essential for living things to survive but it is also used to play! Decorate your "W" with your favorite water activities.
